## Font discovery and unlimited prototyping.

**Eliminate wasted creative spend and unnecessary design cycles. Get the right font for the job, every time.**

Mosaic provides access to Monotype's library of 14,000 fonts. Prototyping with all weights and character sets gives your team the confidence and freedom to do what they do best without having to worry about licensing or managing type across the organization. Font collections provide inspiration, while enhanced search allows fonts to be filtered by mood, style or name.

## **Enable fonts everywhere.**

**Remove one-off requests and bottlenecks by granting font access and rights to everyone who needs it – on an individual or team basis.**

A unified approval process allows teams and individuals to immediately begin working with any font in their favorite creative app. With fonts that work no matter where they appear, global teams and external partners are able to deliver the high-quality experiences customers expect.

# Monotype and Third-party font management.

**Streamline the tools people use to discover, deploy and manage all your fonts – within a single application.**

Large organisations now have a simple way to organise and track font distribution and usage among divisions and subsidiary companies. In addition to the Monotype library, Mosaic allows IT and Procurement teams to upload any third-party foundry's fonts, centralizing licensing and font management in a single cloud-based service. Expertise.

## Which Mosaic is right for you?

**Three distinct options to help agencies and brands.**

Whether you simply want to prototype freely with new fonts until you find the perfect fit; manage the distribution of fonts across your brand with confidence; or access the full breadth of Monotype's expertise through Studio consultation and hands-on customer support, there's a version of Mosaic for you.
